OBJECTIVE

Dedicated Junior Full Stack Developer with a strong foundation in modern web technologies (React, TypeScript, APIs, and more). Passionate about crafting efficient, scalable web solutions and eager to contribute to innovative projects within a dynamic, collaborative team.

EXPERIENCE

Open-Source Developer   (2025 - Present)

- "Fixed responsiveness bugs in the **Sera UI React library**, improving Lighthouse mobile score and **enhancing accessibility for 700+ users**.
- Updated the README for the **Heyputer.com** open-source project to Portuguese and Spanish, expanding access for Latin language communities.
- Contributed TypeScript code examples to the **Grokking Algorithms** book repository, **expanding the content's reach and applicability** for web developers.
- Collaborated remotely with developers via GitHub Pull Requests and Issues in **six different projects**.

PROJECTS

Discord-DevPosting-Bot (Typescript, Node, discordjs)
- A Discord bot built with TypeScript/Node.js that fetches and posts IT job listings from the RemoteOk API. Features include moderation, scheduling, error tracking, and search automation for developers on Discord.

Chronos Pomodoro (React, TypeScript, Vercel)
- Built a customizable Pomodoro timer with React and TypeScript, using advanced hooks and state management. Includes theme switching, custom settings, and task history persistence. Deployed on Vercel. Helps **users boost productivity and focus** through structured work/break cycles.

EDUCATION

Descomplica College   (In progress, expected 2028)

Bachelor's Degree in Computer Science
- **Relevant Coursework:** Programming, Data Structures, System Fundamentals, Databases, Cloud Computing, Web Development, Software Engineering.
- **Bootcamps:** Web Developer Bootcamp 2025, JavaScript (Alura), TailwindCSS from scratch to advanced (Udemy).

SKILLS

- **Frontend**: React, Javascript, Typescript, HTML, CSS, Tailwind, Bootstrap.

- **Backend**: Node.js, Express, MongoDB, PostgreSQL, APIs (REST/GraphQL).

- **Tools**: Git/GitHub, Swagger, NPM, CLI, Copilot.

- **Professional Skills**: Clear communication, problem-solving, adaptability, continuous learning
